The survey is in the town office. The mayor needs to review it and send it on to Western Pocahontas for their approval.

When the weather is better, drainage of the new section must be done. The water issue is limiting the sell of lots ($200 each). The shredded tires at the cemetery, will be used in the construction of the drainage system.

Brochures will be worked on as soon as Tina and Jeannette can work together.

The surveyor will place markers once Western Pocahontas OK's the survey. Then the documents will go to the courthouse.
